BACKGROUND

Basel III regulatory capital rules for large and internationally active banks established the definition of regulatory capital elements and minimum capital ratios, regulatory capital buffers above those minimums, a common equity tier 1 ratio, a supplementary leverage ratio and the rules for calculating risk-weighted assets. Basel III includes two comprehensive methodologies for calculating risk-weighted assets: a general standardized approach and more risk-sensitive advanced approaches. The Company is classified as a Category III banking organization with the passing of the “Prudential Standards for Large Bank Holding Companies, Savings and Loan Holding Companies, and Foreign Banking Organizations” rule, effective December 31, 2019. Therefore, the regulatory capital requirements effective for U.S. Bancorp (the “Company”) follow the general standardized approach.

OVERVIEW

U.S. Bancorp (the “Company”) based in Minneapolis, is the parent company of one of the largest commercial banks in the United States and provides a comprehensive line of banking, investment, mortgage, trust and payment services products to consumers, businesses, and institutions.

This document, and certain of the Company’s public filings, present the Pillar 3 Disclosures in compliance with Basel III as described in Subsections 61-63 of the: Capital Adequacy—Basel III Final Rule (the “Rule”). The Company’s 2020 Annual Report on Form 10-K (“Annual Report”) and its Quarterly Report on Form 10-Q for the quarter ended June 30, 2021 (“Form 10-Q”) filed with the Securities and Exchange Commission contains management’s discussion of the overall corporate risk profile of the Company and related management strategies. These Pillar 3 Disclosures should be read in conjunction with the Annual Report, Form 10-Q, and the Consolidated Financial Statements for Bank Holding Companies - FR Y-9C. The Company’s Pillar 3 Disclosures Matrix (see Appendix A) specifies where all disclosures required by the Rule are located. The Pillar 3 Disclosures have not been audited by the Company’s external auditors.

The Rule applies only to the consolidated Company, with the exception that every depository subsidiary must disclose capital ratios.

CORPORATE GOVERNANCE

Managing risks is an essential part of successfully operating a financial services company. The Company’s Board of Directors has approved a risk management framework which establishes governance and risk management requirements for all risk-taking activities. This framework includes Company and business line risk appetite statements which set boundaries for the types and amount of risk that may be undertaken in pursuing business objectives and initiatives. The Board of Directors, through its Risk Management and Capital Planning Committees, oversees performance relative to the risk management framework, risk appetite statements, and other policy requirements.

The Executive Risk Committee (“ERC”), which is chaired by the Chief Risk Officer and includes the Chief Executive Officer and other members of the executive management team, oversees execution against the risk management framework and risk appetite statements. The ERC focuses on current and emerging risks, including strategic and reputational risks, by directing timely and comprehensive actions. Senior operating committees have also been established, each responsible for overseeing a specified category of risk.

The Company’s most prominent risk exposures are credit, interest rate, market, liquidity, operational, compliance, strategic, and reputational risk. Credit risk is the risk of loss associated with a change in the credit profile or the failure of a borrower or counterparty to meet its contractual obligations. Interest rate risk is the potential reduction of net interest income or market valuations as a result of changes in interest rates. Market risk arises from fluctuations in interest rates, foreign exchange rates, and security prices that may result in changes in the values of financial instruments, such as trading and available-for-sale securities, mortgage loans held for sale, mortgage servicing rights (“MSRs”) and derivatives that are accounted for on a fair value basis. Liquidity risk is the possible inability to fund obligations or new business at a reasonable cost and in a timely manner. Operational risk is the risk to current or projected financial condition and resilience arising from inadequate or failed internal processes or systems, people (including human errors or misconduct), or adverse external events, including the risk of loss resulting from breaches in data security. Operational risk can also include the risk of loss due to failures by third parties with which the Company does business. Compliance risk is the risk that the Company may suffer legal or regulatory sanctions,

financial losses and reputational damage if the Company fails to adhere to compliance requirements and the Company's compliance policies. Strategic risk is the risk to current or projected financial condition and resilience arising from adverse business decisions, poor implementation of business decisions, or lack of responsiveness to changes in the banking industry and operating environment. Reputation risk is the risk to current or anticipated earnings, capital, or franchise or enterprise value arising from negative public opinion. This risk may impair the Company's competitiveness by affecting its ability to establish new relationships or services or continue servicing existing relationships. In addition to the risks identified above, other risk factors exist that may impact the Company. Refer to "Risk Factors" in the Annual Report for a detailed discussion of these factors.

The Company's Board of Directors and management-level governance committees are supported by a "three lines of defense" model for establishing effective checks and balances. The first line of defense, the business lines, manages risks in conformity with established limits and policy requirements. In turn, business leaders and their risk officers establish programs to ensure conformity with these limits and policy requirements. The second line of defense, which is primarily aligned to the Chief Risk Officer's organization but also includes policy and oversight activities of corporate support functions, translates risk appetite and strategy into actionable risk limits and policies. The second line of defense monitors first line of defense conformity with limits and policies and provides reporting and escalation of emerging risks and other concerns to senior management and the Risk Management Committee of the Board of Directors. The third line of defense, internal audit, is responsible for providing the Audit Committee of the Board of Directors and senior management with independent assessment and assurance regarding the effectiveness of the Company's governance, risk management, and control processes.

INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS (ICAAP)

The Company's ICAAP is a component of its Basel Program. The Company manages its capital to multiple minimum thresholds and measures that are consistent with the Company's strategic objectives, business model and capital plan. Expectations of internal and external stakeholders are integral, and the capital goals and targets are calibrated considering internally developed models that ensure adequate coverage for all material quantitative and qualitative risks, minimum regulatory requirements, supervisory stress testing expectations and rating agency and counterparty perspectives.

The Company is committed to managing capital to maintain strong protection for depositors and creditors, and for maximum shareholder benefit in order to achieve the Company's broader goals, which are as follows:

- Ensure the Company's safety and soundness;
- Maintain access to the debt and capital markets so the Company may continue to provide exceptional service to its customers and fulfill, without interruption, its obligations as a credit intermediary;
- Serve as a source of managerial and financial strength to its subsidiaries; and
- Ensure that the Company continues to be in a position to conduct its business in an environment of economic or financial stress.

The Company's ICAAP, the identification of material risks and how those material risks inform capital adequacy, is conducted via the Company's stress testing program. Through this process the Company's material risks, informed by the risk identification process, are critical to the scenario design process and the development of the Company's internal stress scenario. The results of these forward-looking scenarios inform the Company's regulatory and internally defined capital adequacy relative to the Company's risk profile and risk appetite.

REGULATORY CAPITAL ADEQUACY RATIOS

The Company also manages its capital to exceed regulatory capital requirements for well-capitalized financial institutions. The Company's applicable capital requirement for regulatory and supervisory purposes is based upon the ratios determined under the standardized approach.

Banking regulators define capital requirements for banks and financial services holding companies expressed in the form of a common equity tier 1 capital ratio, a tier 1 capital ratio, a total risk-based capital ratio, a leverage ratio and for advanced approaches banks and category III banks, a supplementary leverage ratio. The current minimum required levels, for these ratios are 4.5 percent, 6.0 percent, 8.0 percent, 4.0 percent and 3.0 percent, respectively, while the requirements for an insured depository institution to be considered "well-capitalized" are 6.5 percent, 8.0

percent, 10.0 percent, 5.0 percent and 3.0 percent, respectively. Using the standardized approach rule the common equity tier 1 ratio was 9.9 percent at June 30, 2021 — above the Company’s targeted ratio of 8.5 percent.

A summary of the capital ratios under the standardized is shown in Table 1.

Table 1 Regulatory Capital Ratios

(Dollars in Millions, Unaudited)	U.S. Bancorp		U.S. Bank National Association	
	June 30, 2021	December 31, 2020	June 30, 2021	December 31, 2020
Common Equity Tier 1 capital	\$39,691	\$38,045	\$45,012	\$44,155
Tier 1 capital	46,103	44,474	45,456	44,600
Total risk-based capital	53,625	52,602	53,759	52,967
Common Equity Tier 1 capital as a percent of risk-weighted assets	9.9 %	9.7 %	11.4 %	11.4
Tier 1 capital as a percent of risk-weighted assets	11.5 %	11.3 %	11.6 %	11.5
Tier 1 risk-based capital as a percent of adjusted quarterly average assets (leverage ratio)	8.5 %	8.3 %	8.5 %	8.4
Tier 1 risk-based capital as a percent of total on and off balance sheet average exposures (supplementary leverage ratio)	6.8 %	7.3 %	6.8 %	6.8
Total risk-based capital as a percent of risk-weighted assets	13.4 %	13.4 %	13.7 %	13.7
Risk-Weighted Assets	\$401,301	\$393,648	\$393,283	\$387,388

The Company’s total shareholders’ equity was \$53.0 billion at June 30, 2021, compared with \$53.1 billion at December 31, 2020. The decrease was primarily the result of common share repurchases, dividends, realized gains and losses on available-for-sale investment securities included in other income (loss), partially offset by corporate earnings. . In compliance with the Rule, the Company reviewed the aggregate amount of surplus capital of insurance subsidiaries included in the regulatory capital of the consolidated group and has determined that it was not material. Refer to “Management’s Discussion and Analysis—Capital Management” in the Annual Report and Form 10-Q for further discussion on capital management.

In addition to capital ratios defined by banking regulators, the Company considers various other measures when evaluating capital utilization and adequacy. These measures are viewed by management as useful additional methods of reflecting the level of capital available to withstand unexpected market or economic conditions. Additionally, presentation of these measures allows investors, analysts, and banking regulators to assess the Company’s capital position relative to other financial services companies. These measures differ from the currently effective capital ratios defined by current banking regulations principally in that the numerator excludes trust preferred securities and preferred stock, the nature and extent of which varies among different financial services companies. These measures are not defined in generally accepted accounting principles (“GAAP”) or are not currently effective or defined in federal banking regulations. As a result, these measures disclosed by the Company may be considered non-GAAP financial measures.

Stress Capital Buffer

Effective October 1, 2020 the Federal Reserve Board (FRB) introduced a new Stress Capital Buffer (SCB) replacing the capital conservation buffer. The SCB is calculated based on the decrease in the Company’s Common Equity Tier 1 Capital under the severely adverse scenario in the FRB’s annual supervisory stress test and related Comprehensive Capital Analysis and Review (CCAR), plus four quarters of planned common stock dividends as a percentage of risk-weighted assets subject to a floor of 2.5percent. A company’s SCB is added to the minimum capital requirement noted above for the risk-based ratios and is the level of capital where restrictions on distributions and discretionary bonuses begin. The Company is currently subject to an SCB requirement of 2.5 percent based on its 2020 stress results. Furthermore, based on its 2021 stress results this requirement will remain in effect through September 30, 2022.

The FRB, OCC and FDIC also adopted a final rule that revises the definition of “eligible retained income” for purposes of the SCB and other capital buffer requirements. This revision reduces the likelihood that a banking organization is suddenly subject to abrupt and restrictive distribution limitations in a scenario where the Company’s ratios fall within its applicable minimum-plus-buffer requirements. The change to the definition of eligible retained income allow banking organizations to more freely use their capital and leverage buffers and supports banking organizations’ lending activity and other financial intermediation activities to avoid compounding negative impacts in the financial markets. Under the final rule, eligible retained income is the greater of (i) the banking organization’s net income for the four preceding calendar quarters, net of any distributions and associated tax effects not already reflected in net income, and (ii) the average of the banking organization’s net income over the preceding four quarters. The Company’s eligible retained income at June 30, 2021 was \$3.0 billion.

Table 2 Non-GAAP Capital Ratios

(Unaudited)	June 30, 2021	December 31, 2020
Tangible common equity to tangible assets	6.8 %	6.9 %
Tangible common equity to risk-weighted assets	9.3 %	9.5 %
Common equity tier 1 capital to risk-weighted assets, reflecting the full implementation of the current expected credit losses methodology	9.5 %	9.3 %

Refer to “Management’s Discussion and Analysis—Non-GAAP Financial Measures” in the Annual Report and Form 10-Q for further discussion on the non-GAAP capital ratios.

Table 3 Supplementary Leverage Ratio

Advanced approaches banks and category III banks are required to report the Supplementary Leverage Ratio (SLR) defined as tier 1 capital divided by the total leverage exposure which includes both on- and off-balance sheet exposures. The Company as a Category III banking organization, is required to maintain an SLR of at least 3.0 percent. At June 30, 2021, the Company’s, and subsidiary bank’s SLR exceeded the requirement with ratios of 6.8 percent for both compared to 7.3 percent and 6.8 percent, respectively, at December 31, 2020.

(Dollars in millions, Unaudited)	US Bancorp June 30, 2021	US Bank NA June 30, 2021
Summary Comparison of Accounting Assets and Total Leverage Exposure		
Total Consolidated Assets as reported in published financial statements	\$552,118	\$542,236
Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consideration	-	-
Adjustments for fiduciary assets recognized on balance sheet but excluded from total leverage exposure	-	-
Adjustment for derivative exposures	16,671	16,626
Adjustment for repo-style transactions	2,353	11
Adjustment for off-balance sheet exposures (credit equivalent)	117,136	117,105
Less Other adjustments		
Adjustments for deductions from Tier 1 Capital	10,129	9,663
Adjustments for frequency calculations	3,426	(1,263)
Total Leverage Exposure banking organizations	674,723	667,578
Supplementary Leverage Ratio		
On-balance sheet exposures		
On-balance sheet assets (excluding on-balance sheet assets for repo-style transactions and derivative exposures, but including cash collateral received in derivative transactions)	548,692	540,973
LESS: Deductions from common equity tier 1 capital and additional tier 1 capital (report as a positive value)	10,129	9,663
Total on-balance sheet exposures	538,563	531,310
Derivative exposures		
Replacement cost for derivative exposures (net of cash variation margin)	3,063	3,063
Add-on amounts for potential future exposure (PFE) for derivatives exposures	6,646	6,601
Gross-up for cash collateral posted if deducted from the on-balance sheet assets, except for cash variation margin	89	89
LESS: Deductions of receivable assets for cash variation margin posted in derivatives transactions, if included in on-balance sheet assets (report as a positive value)	-	-
LESS: Exempted CCP leg of client-cleared transactions (report as a positive value)	-	-
Effective notional principal amount of sold credit protection	6,873	6,873
LESS: Effective notional principal amount offsets and PFE adjustments for sold credit protection (report as a positive value)	0	0
Total derivative exposures	16,671	16,626
Repo-style transactions		
On-balance sheet assets for repo-style transactions, include the gross value of receivables for reverse repurchase transactions	2,286	0
LESS: Reduction of the gross value of receivables in reverse repurchase transactions by cash payables in repurchase transactions under netting agreements (report as a positive value)	-	-
Counterparty credit risk for all repo-style transactions	67	11
Exposure for repo-style transactions where a banking organization acts as an agent	-	-
Total exposures for repo-style transactions	2,353	11
Other off-balance sheet exposures		
Off-balance sheet exposures at gross notional amounts	369,662	369,631
LESS: Adjustments for conversion to credit equivalent amounts	252,526	252,526
Off-balance sheet exposures	117,136	117,105
Capital and total leverage exposures		
Tier 1 Capital	46,103	45,456
Total leverage exposure	\$674,723	\$665,052
Supplementary Leverage Ratio	6.8%	6.8%

STANDARDIZED APPROACH RISK-WEIGHTED ASSETS

Risk-weighted assets represent an institution's assets and off-balance sheet exposures, weighted according to the risk associated with each exposure category. The risk-weighted asset calculation is used in determining the institution's capital requirement.

The standardized approach assigns each credit exposure category to a predefined risk weight classification.

Standardized approach risk-weighted assets were \$401.3 billion at June 30, 2021, compared with \$393.6 billion at December 31, 2020. The increase in risk-weighted assets was primarily driven by increases in investments in agency mortgage backed securities, auto loans and personal installment loans as well as an increase in the value of mortgage servicing assets. Additionally, off balance sheet exposures increased as a result of higher unfunded corporate loan commitments driven by continued paydowns. These increases were partially offset by decreases in residential mortgage loans, credit card exposures as and domestic derivatives primarily in interest rate contracts.

Table 4 Risk-Weighted Assets

(Dollars in Millions, Unaudited)	June 30, 2021	December 31, 2020	\$ Change	Percent Change
Credit risk				
Exposures to Sovereign Entities (a)	\$ -	\$ -	\$ -	0.0 %
Exposures to Depository Entities	537	731	(194)	(26.5)
PSE Exposures	22,614	18,759	3,855	20.6
Corporate Exposures	115,041	115,035	6	0.0
Residential Mortgage Exposures	47,774	51,910	(4,136)	(8.0)
HVCRE loans	4,125	4,316	(191)	(4.4)
Past Due Loans	1,578	1,500	78	5.2
Other Assets	107,160	100,959	6,201	6.1
Cleared Transactions	-	-	-	0.0
Default Fund Contributions	7	11	(4)	(36.4)
Unsettled Transactions	-	1	(1)	0.0
Securitization Exposures	781	520	261	50.2
Equity Exposures	9,693	10,335	(642)	(6.2)
Off Balance Sheet Exposures				
Letters of Credit	6,666	7,175	(509)	(7.1)
Off Balance sheet commitments	76,940	74,015	2,925	4.0
Derivatives	4,836	6,462	(1,626)	(25.2)
Securitizations	367	420	(53)	(12.5)
Other Off Balance Sheet Exposures	265	211	54	25.6
Market risk	2,917	2,319	598	25.8
Excess Allowance	-	(1,031)	1,031	100.0
Total risk-weighted assets.	\$401,301	\$393,648	\$7,653	1.9 %

(a) Exposures to and portions of exposures that are unconditionally guaranteed by, the U.S. Government, its agencies and the federal reserve receive 0% risk weight.

Credit Risk Mitigation The Company's underwriting approach is to grant credit on the basis of capacity to repay rather than placing primary reliance on credit risk mitigation. Mitigation is nevertheless an important aspect of effective risk management. Various risk mitigation techniques are used by the Company, including collateral, guarantees and, to a limited extent, credit derivatives.

The Company has a process that takes into account the risk-reducing effects of collateral in support of exposures. Examples of collateral that impact the Company's estimate include, but are not limited to, cash, working capital, depreciable assets and real estate. Unsecured exposures generally result in larger losses while secured exposures generally result in smaller losses.

The Company may use credit default swaps ("CDS") to manage the credit risk of certain large wholesale loan exposures, with the goal of reducing concentrations in individual names. CDS are subject to credit risk associated with counterparties to the contracts.

Credit risk mitigants are valued to monitor and ensure they will continue to provide the secure repayment source anticipated at the time they were taken. Company policy prescribes the frequency of valuation based on the volatility of the collateral. Valuation methods range from the use of market indices to individual professional inspection.

Counterparty Credit Risk of OTC Derivative Contracts, Repo-Style Transactions and Eligible Margin Loans

Counterparty exposure arises from OTC derivatives, repurchase agreements, securities lending and borrowing and other similar products and activities. The exposure amount depends on the value of underlying market factors (e.g. interest rates and foreign exchange rates), which can be volatile and uncertain in nature.

The Company reduces its counterparty exposure related to derivative contracts by centrally clearing all eligible derivatives. All other credit exposure is approved either on a transaction level basis, or under credit limits supporting bilateral trades governed by appropriate master trading agreements. The primary element of the credit approval process is a detailed risk assessment of every credit exposure associated with a counterparty. The Company's risk assessment procedures consider both the credit worthiness of the counterparty and the risks related to the specific type of credit facility or exposure. The Company manages the credit risk of its derivative positions by diversifying its positions among various counterparties, entering into master netting arrangements with counterparties where possible, requiring collateral and, in certain cases, though insignificant, transferring the counterparty credit risk related to interest rate swaps to third parties through the use of risk participation arrangements. Credit exposures are monitored daily for counterparties with an established Credit Support Annex ("CSA"), to assure collateral levels are appropriately sized to cover risk, and prior to execution of an initial trade for any counterparty to ensure it does not exceed the approved credit limit for each counterparty.

The Company uses the current exposure to calculate exposure at default (EAD) and determine risk-weighted assets and capital requirements for counterparty risk. EAD is calculated for each counterparty that has an International Swaps and Derivatives Association ("ISDA") Master Agreement with the Company using the collateral haircut approach in the current exposure methodology.

For further information on counterparty credit risk, refer to the "Use of Derivatives to Manage Interest Rate and Other Risks" subsection in the "Management's Discussion and Analysis" section of the Annual Report and Form 10-Q.

Collateral To calculate a counterparty's net risk position for counterparty credit risk, the Company revalues all financial instruments and associated collateral positions on a daily basis. Collateral positions are monitored by a dedicated group who manages a process to ensure calls for collateral and exposure reductions are made promptly. Processes exist for the resolution of trades where the level of collateral is disputed, or the collateral sought is not received.

Eligible collateral types are documented by a CSA to the ISDA Master Agreement and are controlled under the Company's general credit policies. A valuation haircut policy reflects the fact collateral may fall in value between the date the collateral is called and the date of liquidation or enforcement. In practice, most of the Company's collateral held as credit risk mitigation under a CSA is either cash or U.S. government securities.

Credit ratings downgrade Certain credit support annexes to master arrangements provide for rating dependent triggers, where additional collateral has to be pledged if a party's rating is downgraded. The Company also enters into master arrangements that provide for an additional termination event upon a party's rating downgrade.

The Company analyzes and monitors its potential contingent payment obligations resulting from a rating downgrade in its stress testing approach for liquidity risk on an ongoing basis. At June 30, 2021, the additional collateral required to be posted for a three-notch downgrade of U.S. Bank National Association would be \$111.9 million. No additional collateral would be required for a three-notch downgrade of its parent company, U.S. Bancorp.

The following table summarizes the netting and collateral positions of the Company's derivatives and securities financing transactions ("SFT") using the Current Exposure Method. As defined by the Rule, the gross current credit exposure is calculated as the greater of the positive mark-to-market of the derivative or zero (asset derivatives).

Table 5 General Disclosure for Counterparty Credit Risk of OTC Derivative Contracts, Repo-Style Transactions, and Eligible Margin Loans

(Dollars in Millions, Unaudited)	June 30, 2021	December 31, 2020
Derivatives		
Gross positive fair value	\$4,672	\$6,001
Netting benefit (a)	-	-
Net derivatives credit exposure	<u>\$4,672</u>	<u>\$6,001</u>
Securities financing transactions		
Gross positive fair value	\$12,022	\$8,417
Collateral held for risk mitigation (b)	(10,080)	(6,461)
Excess collateral (c)	263	164
Net SFT credit exposure	<u>\$2,205</u>	<u>\$2,120</u>

(a) Represents netting of derivative asset and liability balances, and related collateral, with the same counterparty subject to master netting agreements.

(b) All collateral is either cash or money market investments.

(c) Certain counterparties have provided collateral in excess of the fair value of the related contracts.

The distribution of gross current credit exposure is shown below:

(Dollars in Millions, Unaudited)	June 30, 2021		December 31, 2020	
	Gross Current Credit Exposure	Exposure at Default (a)	Gross Current Credit Exposure	Exposure at Default (a)
Derivatives				
Credit derivatives (b)	\$1	\$681	\$1	\$757
Derivatives	3,267	7,290	4,072	9,358
Foreign exchange forwards and options	1,248	2,099	1,605	2,750
Mortgage derivatives	157	128	323	273
Total derivative gross current credit exposure (c)	<u>\$4,673</u>	<u>\$10,198</u>	<u>\$6,001</u>	<u>\$13,138</u>
Securities financing transactions				
Repo-Style Transactions	\$11,994	\$1,110	\$8,391	\$829
Eligible margin loans	28	28	26	26
Total SFT gross current credit exposure (c)	<u>\$12,022</u>	<u>\$1,138</u>	<u>\$8,417</u>	<u>\$855</u>

(a) In addition to the current fair value for asset derivatives, EAD includes amounts for the potential future exposure which is calculated on both asset and liability derivatives.

(b) Credit derivatives have a notional amount of \$3.2 billion for asset derivatives and \$7.3 billion for liability derivatives at June 30, 2021 and \$2.9 billion for asset derivatives and \$7.5 billion for liability derivatives at December 31, 2020.

(c) The gross positive fair value of derivative contracts averaged \$3.0 billion for the second quarter of 2021 and \$4.2 billion for the fourth quarter of 2020. The gross positive fair value of SFT contracts averaged \$9.8 billion for the second quarter of 2020 and \$6.3 billion for the fourth quarter of 2020.

Securitization The disclosures in this section refer to securitizations held in the banking book and the regulatory capital on these exposures calculated according to the Rule. A participant in the securitization market is typically an originator, investor, or sponsor. The Company's primary securitization-related activity is investing in products created by third parties and entering into secured lending transactions with clients. Securitization exposures held in the banking book include traditional non-government or non-agency guaranteed ABS and MBS securitizations, loans, lines of credit, and liquidity facilities. The Company is not applying any credit risk mitigation to its securitization exposures and doesn't have exposure to securitization guarantors. The Company does not have any synthetic securitization exposure and does not act as a sponsor.

The Company calculates the regulatory capital requirement for securitization exposures in accordance with the hierarchy of approaches prescribed in the Rule. The Company utilizes the Simplified Supervisory Formula Approach ("SSFA") to determine risk-weighted assets for the majority of its securitization exposures. The SSFA framework considers the Company's seniority in the securitization structure and risk factors inherent in the underlying assets.

As presented in Table 6 below, the Company's total securitization exposures at June 30, 2021, were \$5.3 billion compared to \$3.8 billion at December 31, 2020.

Table 6 Securitizations

Securitizations by exposure type are shown below (a):

(Dollars in Millions, Unaudited)	June 30, 2021			December 31, 2020		
	On Balance Sheet Exposure	Off Balance Sheet Exposure	Total Exposure	On Balance Sheet Exposure	Off Balance Sheet Exposure	Total Exposure
Mortgage-backed securities	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
Asset-backed securities	200	-	200	205	-	205
Other (b)	3,077	2,068	5,145	1,278	2,363	3,641
Total securitization exposure	\$3,277	\$2,068	\$5,345	\$1,483	\$2,363	\$3,846

Securitizations by capital treatment and underlying exposure type are shown below (a):

(Dollars in Millions, Unaudited)	June 30, 2021			December 31, 2020		
	Notional Amount	SSFA Risk Weighted Assets	1250% Risk Weighted	Notional Amount	SSFA Risk Weighted Assets	1250% Risk Weighted
Mortgage-backed securities	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
Asset-backed securities	200	45	-	205	57	-
Other (b)	5,145	1,019	107	3,641	797	102
Total securitization exposure	\$5,345	\$1,064	\$107	\$3,846	\$854	\$102

Securitizations by capital treatment and risk-weight bands are summarized below (a):

(Dollars in Millions, Unaudited)	June 30, 2021				December 31, 2020			
	Notional Amount	SSFA Risk Weighted Assets	1250% Risk Weighted	Capital impact of RWA (e)	Notional Amount	SSFA Risk Weighted Assets	1250% Risk Weighted	Capital impact of RWA (e)
Securitizations								
Zero to 250% risk weighting	\$5,334	\$1,058	\$ -	\$85	\$3,834	\$837	\$ -	\$67
251% to 500% risk weighting	2	6	-	-	2	7	-	1
501% to 1250% risk weighting	9	-	107	9	10	10	102	9
Resecuritizations								
Zero to 250% risk weighting	-	-	-	-	-	-	-	-
251% to 500% risk weighting	-	-	-	-	-	-	-	-
501% to 1250% risk weighting	-	-	-	-	-	-	-	-
Total securitization exposures	\$5,345	\$1,064	\$107	\$94	\$3,846	\$854	\$102	\$77

(a) Table related to the Company as an investor/originator in the securitization.

(b) Includes loans, lines of credit, and liquidity facilities.

(c) The capital impact of RWA is calculated by multiplying risk weighted assets by the minimum total risk-based capital ratio of 8%.

Equity Securities Not Subject to Market Risk Rule The Company has total equity exposures of approximately \$16.1 billion, with \$10.6 billion in individual equities and \$5.5 billion in equity funds at June 30, 2021. The majority of the individual investments are related to the Company's community reinvestment activities, including tax-advantaged investments made through U.S. Bancorp Community Development Corporation. The Company uses the Simple Risk-Weight Approach for its individual equity securities.

Equity exposures in investment funds consist of Bank Owned Life Insurance ("BOLI"), private equity, money market and other equity funds. The Company uses the Full Look-Through Approach for BOLI assets in separate and hybrid accounts. Investment guidelines specify objectives and constraints for separate and hybrid account BOLI investment funds, requirements, and duration parameters. In compliance with these guidelines, underlying investment exposures include Treasury, agency, asset-backed, and mortgage-backed securities and corporate notes and bonds.

Non-marketable equity securities are generally recorded either at historical cost or by using the equity method. Details of the Company's accounting policy for equity investments and the valuation of financial instruments are provided in Note 1—Significant Accounting Policies in the Annual Report Form 10-K.

Marketable equity securities are generally recorded as available-for-sale and carried at fair value with unrealized net gains or losses reported within other comprehensive income (loss) in shareholders' equity. For regulatory capital purposes unrealized gains are excluded from tier 1 capital.

Equity securities maintained in the trading account are reported at fair value with changes in fair value recorded in earnings. At June 30, 2021, the Company does not have material equity exposure in the trading account.

The Company had no realized gains arising from the sales and liquidations of equity securities during the second quarter of 2021.

Table 7 summarizes the Company's equity securities not subject to the market risk rule. Latent revaluation gains/losses are unrealized gains/losses on nonpublic equity securities recorded at cost; these latent revaluation gains/losses are not recognized in the Company's financial statements. Latent revaluation gains were \$189 million and \$177 million at June 30, 2021 and December 31, 2020, respectively.

Table 7 Equity Securities Not Subject to Market Risk Rule

(Dollars In Millions, Unaudited)	June 30, 2021			December 31, 2020		
	Nonpublic	Public	Total	Nonpublic	Public	Total
Amortized cost	\$16,054	\$13	\$16,067	\$15,927	\$25	\$15,952
Unrealized gains/losses	-	-	-	-	-	-
Latent revaluation gains/losses (a)	189	-	189	177	-	177
Fair value	\$16,243	\$13	\$16,256	\$16,104	\$25	\$16,129
Unrealized gains/losses included in risk-based capital	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

(a) Represents unrealized gains (losses) on nonpublic equity securities recorded at cost. The unrealized gains (losses) are not recognized either in the balance sheet or through earnings.

The capital requirements of equity securities are shown below:

(Dollars In Millions, Unaudited)	June 30, 2021			December 31, 2020		
	Exposure	Risk Weighted Assets	Capital impact of RWA	Exposure	Risk Weighted Assets	Capital impact of RWA
0%	\$443	\$ -	\$ -	\$443	\$ -	\$ -

Full look-through approach	5,457	1,131	90	5,440	1,098	88
Total capital requirements for equity securities	\$16,067	\$10,945	\$875	\$15,952	\$10,935	\$875

MARKET RISK

In addition to interest rate risk, the Company is exposed to other forms of market risk, including: 1) trading activities which support customers' strategies to manage their own foreign currency, interest rate risk and funding activities; 2) hedging activities related to mortgage loans held for sale and MSRs; and 3) valuation of the Company's investment portfolio. Market risk risk-weighted assets for trading activities increased to \$2.9 billion at June 30, 2021 compared to \$2.3 billion at December 31, 2020 due to increased holdings of corporate bonds. Refer to the "Market Risk Management" section of the "Management's Discussion and Analysis" section of the Annual Report and Form 10-Q for further discussion of market risk associated with client related trading and mortgage hedging.

CREDIT RISK: GENERAL DISCLOSURES

The Company's strategy for credit risk management includes well-defined, centralized credit policies, uniform underwriting criteria, and ongoing risk monitoring and review processes for all commercial and consumer credit exposures. The strategy also emphasizes diversification on an industry, geographic and customer level, regular credit examinations and management reviews of loans exhibiting deterioration of credit quality. The Company's credit risk management strategy, including its rating system, is subject to an independent review function to ensure the control mechanisms are operating as intended. For further detail on the Company's general credit risk management, see the "Credit Risk Management" section of "Management's Discussion and Analysis" in the Annual Report and Form 10-Q.

Disclosures included in this Credit Risk: General Disclosures are presented under the interpretation that the Rule's definition of "major types of credit exposures" corresponds to the definition in the Company's Annual Report and Form 10-Q. The tables report balance sheet classifications consistent with the Annual Report and Form 10-Q. Credit risk associated with loans, debt securities, commitments to extend credit and letters of credit are presented in this section. Credit risk associated with other off-balance sheet commitments and OTC derivatives are presented in other

tables which is consistent with the Company's disclosures in the Annual Report and Form 10-Q. See the Company's Pillar 3 Disclosures Matrix for the location of other off-balance sheet credit risk disclosures.

The Company categorizes its loan portfolio into two segments, which is the level at which it develops and documents a systematic methodology to determine the allowance for credit losses based on expected credit losses given current credit quality and reasonable and supportable economic forecasts. The Company's loan portfolio segments are commercial lending and consumer lending. The Company further disaggregates its loans into various classes based on their underlying risk characteristics. The two classes within the commercial lending segment are commercial and commercial real estate loans. The three classes within the consumer lending segment are residential mortgages, credit card loans and other retail loans. Trends in delinquency and nonperforming ratios are an indicator, among other considerations, of credit risk within the Company's loan portfolios.

Table 8 provides industry distribution by major types of credit exposure. The credit exposure includes loans, contractual commitments to extend credit and letters of credit. This differs from the industry distribution by major types of credit exposure disclosed in the Company's Annual Report and Form 10-Q, which includes only loans.

(a) Net of participations sold.

The Company's investment securities portfolio includes U.S. Treasury and agencies, agency mortgage-backed securities, and obligations of state and political subdivisions (municipal securities). The most important feature management relies on when assessing credit risk for U.S. Treasury and agencies and agency mortgage-backed securities is the guarantee of the federal government or its agencies. Geography is one of the factors the Company considers in managing its investment in municipal securities. Table 10 shows that the Company's municipal securities are distributed throughout the major regions of the United States.

Table 10 Municipal Securities by Geography

(Dollars in Millions, Unaudited)	June 30, 2021		December 31, 2020	
	Amount	Percent of Total	Amount	Percent of Total
Municipal securities

Midwest	1,034	10.2	894	10.1
Multi-state	-	-	-	-
Total municipal securities	\$10,143	100.0 %	\$8,861	100.0 %

Table 11 provides a maturity distribution by loan category for loans, contractual commitments to extend credit and letters of credit. The contractual amounts of commitments to extend credit and letters of credit represent the Company's maximum exposure to credit loss, in the event of default by the borrower if the borrower were to fully draw against the commitment. The Company manages this credit risk by using the same credit policies it applies to loans. Management assesses the borrower's credit worthiness to determine the necessary collateral, which may include marketable securities, receivables, inventory, equipment, and real estate. Refer to the Annual Report and Form 10-Q for further details.

Table 11 Credit Risk and Maturity by Exposure Type

Loan maturity distribution by loan category:

(Dollars in Millions, Unaudited)	June 30, 2021				December 31, 2020			
	One Year or Less	Over One Through Five Years	Over Five Years	Total	One Year or Less	Over One Through Five Years	Over Five Years	Total
Commercial	\$42,887	\$57,713	\$2,921	\$103,521	\$42,147	\$58,051	\$2,673	\$102,871

The past due and nonperforming loan tables include \$482 million of TDRs that are not performing in accordance with the modified terms in nonperforming loans. In addition, performing TDRs that are past due are reported according to contractual delinquency. Performing TDRs of \$87 million are included in 90 days past due and performing TDRs of \$108 million are included in 30-89 days past due. The past due and nonperforming loan tables above exclude approximately \$2.0 billion of TDRs that are considered current with the modified terms. See the Company's Annual Report and Form 10-Q for more information on TDRs and nonperforming loans.

In addition to industry, the Company uses the geography of the borrower's business or property location in the case of real estate secured loans, among other key risk characteristics, to determine estimates about the likelihood of default by the borrowers and the severity of loss in the event of default. Table 13 provides geographic detail on past due and nonperforming loans.

Table 14 shows the amount of the allowance for credit losses by loan portfolio class. Although the Company determines the amount of each element of the allowance separately and considers this process to be an important credit management tool, the entire allowance for credit losses is available for the entire loan portfolio. The actual amount of losses incurred can vary significantly from the estimated amounts. Effective January 1, 2020, the Company adopted new accounting guidance which changed previous impairment recognition to a model that is based on expected losses rather than incurred losses. This change resulted in increased allowance for credit loss.

Management evaluates the appropriateness of the allowance for credit losses on a quarterly basis. The allowance considers expected losses for the remaining lives of the applicable assets. Multiple economic scenarios are considered over a three-year reasonable and supportable forecast period, which incorporates historical loss experience in years two and three. After the forecast period, the Company fully reverts to long-term historical loss experience, adjusted for prepayments and characteristics of the current loan and lease portfolio, to estimate losses over the remaining lives. The economic scenarios are updated at least quarterly and are designed to provide a range of reasonable estimates, both better and worse than current expectations. Refer to “Management’s Discussion and Analysis--Analysis and Determination of the Allowance for Credit Losses” in the Annual Report and Form 10-Q for further discussion on the evaluation of the allowance for credit losses.

FORWARD-LOOKING STATEMENTS

The following information appears in accordance with the Private Securities Litigation Reform Act of 1995:

This Pillar 3 Disclosures document contains forward-looking statements about the Company. Statements that are not historical or current facts, including statements about beliefs and expectations, are forward-looking statements and are based on the information available to, and assumptions and estimates made by, management as of the date hereof. These forward-looking statements cover, among other things, anticipated future revenue and expenses and the future plans and prospects of the Company.

Forward-looking statements involve inherent risks and uncertainties, and important factors could cause actual results to differ materially from those anticipated. The COVID-19 pandemic is adversely affecting us, our customers, counterparties, employees, and third-party service providers, and the ultimate extent of the impacts on our business, financial position, results of operations, liquidity, and prospects is uncertain. Continued deterioration in general business and economic conditions or turbulence in domestic or global financial markets could adversely affect the Company’s revenues and the values of its assets and liabilities, reduce the availability of funding to certain financial institutions, lead to a tightening of credit and increase stock price volatility. In addition, changes to statutes, regulations, or regulatory policies or practices could affect the Company in substantial and unpredictable ways. The Company’s results could also be adversely affected by changes in interest rates; further increases in unemployment rates; deterioration in the credit quality of its loan portfolios or in the value of the collateral securing those loans; deterioration in the value of its investment securities; legal and regulatory developments; litigation; increased competition from both banks and non-banks; civil unrest; changes in customer behavior and preferences; breaches in data security; including as a result of work-from-home arrangements; failures to safeguard personal information; effects of mergers and acquisitions and related integration; effects of critical accounting policies and judgments; and management’s ability to effectively manage credit risk, market risk, operational risk, compliance risk, strategic risk, interest rate risk, liquidity risk and reputational risk.

For discussion of these and other risks that may cause actual results to differ from expectations, refer to the Company’s Annual Report for the year ended December 31, 2020, on file with the Securities and Exchange Commission, including the sections entitled “Risk Factors” and “Corporate Risk Profile” contained in Exhibit 13,

and all subsequent filings with the Securities and Exchange Commission under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934. In addition, factors other than these risks also could adversely affect the Company's results, and the reader should not consider these risks to be a complete set of all potential risks or uncertainties. Forward-looking statements speak only as of the date hereof, and the Company undertakes no obligation to update them in light of new information or future events.

U.S. Bancorp Basel Capital Pillar 3 Disclosures Matrix
As of June 30, 2021

In compliance with the Section-63 Disclosure Requirements by certain institutions with consolidated assets of greater than \$50 Billion that are not advanced approaches institutions: In accordance with the rule, U.S. Bancorp ("Company" or "USB") has provided the following summary of the required disclosure locations. All documents referenced can be found at usbank.com.

Table	Disclosure Requirement	Disclosure Location	Disclosure Page	Source Reference - if applicable
Scope of Application				
Qualitative: (a)	The name of the top corporate entity in the group to which the Risk-Based Capital Standards apply:	<u>Basel Pillar 3 Disclosures (Unaudited)</u> : Overview	3	
(b)	A brief description of the differences in the basis for consolidating entities for accounting and regulatory purposes, with a description of those entities: (1) that are fully consolidated; (2) that are deconsolidated and deducted from total capital; (3) for which the total capital requirement is deducted; and (4) that are neither consolidated nor deducted (for example, where the investment in the entity is assigned a risk weight in accordance with this subpart).	Not applicable. The Company does not have differences in the basis of consolidation for accounting and regulatory purposes.	None	None
(c)	Any restrictions, or other major impediments, on transfer of funds or regulatory capital within the group.	<u>2020 Annual Report (Audited)</u> : Note 24--U.S. Bancorp (Parent Company) Consolidated Balance Sheet		<u>2020 Annual Report</u> pg 139-140
Quantitative: (d)	The aggregate amount of surplus capital of insurance subsidiaries included in the regulatory capital of the consolidated group.	<u>FR Y9-C</u> Schedule HC-R Part I, Regulatory Capital Components and Ratios		<u>FR Y9-C</u> Schedule HC-R Part I
(e)	The aggregate amount by which actual regulatory capital is less than the minimum regulatory capital requirement in all subsidiaries with regulatory capital requirements and the name(s) of the subsidiaries with such deficiencies.	None.	None	None
Capital Structure				
Qualitative: (a)	Summary information on the terms and conditions of the main features of all regulatory capital instruments.	<u>2020 Annual Report (Audited)</u> : MD&A Capital Management Note 13--Long-Term Debt Note 14--Shareholders' Equity Note 15--Earnings per Share <u>Form 100 (unaudited)</u> : MD&A Capital Management (Unaudited) Note 7 -- Preferred Stock Note 9 -- Earnings per Share		<u>2020 Annual Report</u> pg 55-56 pg 102 pg 103-108 pg 108 <u>Form 100</u> pg 27-28 pg 52-53 pg 54
Quantitative: (b)	The amount of tier 1 capital, with separate disclosure of: (1) common stock/surplus; (2) retained earnings; (3) Common Equity minority interest (4) AOCI (net of tax) and other reserves (5) Regulatory adjustments and deductions made to common equity tier 1 capital.	<u>FR Y9-C</u> Schedule HC-R Part I Regulatory Capital Components and Ratios		<u>FR Y9-C</u> Schedule HC-R Part I
(c)	The amount of tier 1 capital, with separate disclosure of: (1) Additional tier 1 capital elements, including additional tier 1 capital instruments and tier 1 minority interest not included in common equity tier 1 capital; and (2) Regulatory adjustments and deductions made to total capital.	<u>FR Y9-C</u> Schedule HC-R Part I Regulatory Capital Components and Ratios <u>Form 100 (unaudited)</u> : Consolidated Balance Sheet		<u>FR Y9-C</u> Schedule HC-R Part I <u>Form 100</u> pg 35
(d)	The amount of total capital, with separate disclosure of: (1) Tier 2 capital elements, including tier 2 capital instruments and total capital minority interest not included in tier 1 capital; and (2) Regulatory adjustments and deductions made to total capital.	<u>FR Y9-C</u> Schedule HC-R Part I Regulatory Capital Components and Ratios		<u>FR Y9-C</u> Schedule HC-R Part I
Capital Adequacy				
Qualitative: (a)	A summary discussion of the bank holding company's approach to assessing the adequacy of its capital to support current and future activities.	<u>2020 Annual Report (Audited)</u> : MD&A Capital Management MD&A Non-GAAP Financial Measures Note 14--Shareholders' Equity <u>Form 100 (unaudited)</u> : MD&A Capital Management (Unaudited) MD&A Non-GAAP Financial Measures <u>Basel Pillar 3 Disclosures (Unaudited)</u> : Internal Capital Adequacy Assessment Process ("ICAAP")	4-5	<u>2020 Annual Report</u> pg 57-58 pg 64-65 pg 104-108 <u>Form 100</u> pg 27-28 pg 33-34
Quantitative: (b)	Risk-weighted assets for credit risk from: Risk-weighted assets for: (1) Exposures to sovereign entities; (2) Exposures to certain supranational entities and MDBs; (3) Exposures to depository institutions, foreign banks, and credit unions; (4) Exposures to PSEs; (5) Corporate exposures; (6) Residential mortgage exposures; (7) Statutory multifamily mortgages and pre-sold construction loans; (8) HVCRE loans; (9) Past due loans; (10) Other assets; (11) Cleared transactions; (12) Default fund contributions; (13) Unsettled transactions; (14) Securitization exposures; and (15) Equity exposures.	<u>FR Y9-C</u> Schedule HC-R Part II, Risk Weighted Assets		<u>FR Y9-C</u> Schedule HC-R Part II.
(c)	Standardized market risk-weighted assets as calculated under subpart F of this part:	<u>FR Y9-C</u> Schedule HC-R Part II, Risk Weighted Assets		<u>FR Y9-C</u> Schedule HC-R Part II.

Table	Disclosure Requirement	Disclosure Location	Disclosure Page	Source Reference - if applicable
(d)	Common Equity tier 1, tier 1 and total risk-based capital ratios: (1) For the top consolidated group; and (2) For each Depository Institution subsidiary.	<u>FR Y9-C - Consolidated Financial Statement for Holding Companies</u> Schedule HC-R Part I Regulatory Capital Components and Ratios U.S. Bancorp <u>FFIEC 031-Consolidated Reports of Conditions and Income for a Bank with Domestic and Foreign Offices</u> Schedule RC-R Part I Regulatory Capital Components and Ratios U.S. Bank National Association (Cincinnati, OH) <u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 1-- Regulatory Capital Ratios	5	<u>FR Y9-C</u> Schedule HC-R Part I <u>FFIEC 031</u> Schedule HC-R Part I

Capital Conservation and Countercyclical Capital Buffers				
Quantitative: (a)	At least quarterly, the bank holding company must calculate and publicly disclose the capital conservation buffer as described under §.11 of subpart B.	<u>FR Y9-C - Consolidated Financial Statement for Holding Companies</u> Schedule HC-R Part I Regulatory Capital Components and Ratios <u>Basel Pillar 3 Disclosures (Unaudited):</u> Capital Conservation Buffer	5	<u>FR Y9-C</u> Schedule HC-R
(b)	At least quarterly, the bank holding company must calculate and publicly disclose the buffer retained income of the bank holding company.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Capital Conservation Buffer	5	
(c)	At least quarterly, the bank holding company must calculate and publicly disclose any limitations it has on distributions and discretionary bonus payments resulting from the capital conservation buffer and the countercyclical capital buffer framework described under §.11 of subpart B, including the maximum payout amount for the quarter.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Capital Conservation Buffer	5	
General Qualitative Disclosure Requirement				
	For each separate risk area described in tables 5 through 10, the bank holding company must describe its risk management objectives and policies, including: (1) Strategies and processes; (2) The structure and organization of the relevant risk management function; (3) The scope and nature of risk reporting and/or measurement systems; (4) Policies for hedging and/or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges/mitigants.	<u>2020 Annual Report (Audited):</u> • MD&A--Balance Sheet Analysis • MD&A--Corporate Risk Profile • Note 1--Significant Accounting Policies • Note 4--Investment Securities • Note 5--Loans and Allowance for Credit Losses • Note 7--Accounting For Transfers and Servicing of Financial Assets and Variable Interest Entities • Note 19--Derivative Instruments • Note 21--Fair Values of Assets and Liabilities • Note 22--Guarantees and Contingent Liabilities <u>Form 10-O (Unaudited):</u> • MD&A--Balance Sheet Analysis • MD&A--Corporate Risk Profile • Note 1--Significant Accounting Policies • Note 3--Investment Securities • Note 4--Loans and Allowance for Credit Losses • Note 15--Guarantees and Contingent Liabilities <u>Credit Risk: General Disclosures</u>	16-25	<u>2020 Annual Report</u> pg 28-36 pg 36-57 pg 79-86 pg 87-89 pg 90-95 pg 97-98 pg 119-123 pg 127-133 pg 133-136 <u>Form 10-O</u> pg 6-8 pg 8-28 pg 40 pg 40-42 pg 43-49 pg 68-70 http://phx.corporate-ir.net/phoenix.zhtml?c=117565&p=irol-govboard
Credit Risk - General Disclosures				
Qualitative: (a)	The general qualitative disclosure requirement with respect to credit risk (excluding counterparty credit risk disclosed in accordance with Table 7) including: (1) Policy for determining past due or delinquency status; (2) Policy for placing loans on nonaccrual; (3) Policy for returning loans to accrual status; (4) Definition of and policy for identifying impaired loans (for financial accounting purposes). (5) Description of the methodology that the entity uses to estimate its allowance for loan and lease losses, including statistical methods used where applicable; (6) Policy for charging-off uncollectible amounts; and (7) Discussion of the bank's credit risk management policy	<u>2020 Annual Report (Audited):</u> • MD&A--Balance Sheet Analysis • MD&A--Corporate Risk Profile • Note 1--Significant Accounting Policies • Note 4--Investment Securities • Note 5--Loans and Allowance for Credit Losses • Note 22--Guarantees and Contingent Liabilities <u>Form 10-O (Unaudited):</u> • MD&A--Balance Sheet Analysis • MD&A--Corporate Risk Profile • Note 1--Significant Accounting Policies • Note 3--Investment Securities • Note 4--Loans and Allowance for Credit Losses • Note 15--Guarantees and Contingent Liabilities <u>Credit Risk: General Disclosures</u>	11-19	<u>2020 Annual Report</u> pg28-36 pg 36-57 pg 79-86 pg 87-89 pg 90-95 pg 133-136 <u>Form 10-O</u> pg 6-8 pg 8-28 pg 40 pg 40-42 pg 43-49 pg 68-70
Quantitative: (b)	Total credit risk exposures and average credit risk exposures, after accounting offsets in accordance with GAAP, without taking into account the effects of credit risk mitigation techniques (for example, collateral and netting not permitted under GAAP), over the period categorized by major types of credit exposure. For example, bank holding companies could use categories similar to that used for financial statement purposes. Such categories might include, for instance: (1) Loans, off-balance sheet commitments, and other non-derivative off-balance sheet exposures; (2) Debt securities; and (3) OTC derivatives.	<u>2020 Annual Report (Audited):</u> • Note 5--Loans and Allowance for Credit Losses • Consolidated Daily Average Balance Sheet and Related Yields and Rates <u>FR Y-9C (Unaudited):</u> • Schedule HC-B - Securities • Schedule HC-L - Derivatives and Off-Balance-Sheet Items <u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 5--General Disclosure for Counterparty Credit Risk of OTC Derivative Contracts, Repo-Style Transactions, and Eligible Margin Loans Table 11--Credit Risk and Maturity by Exposure Type	9 15-16	<u>2020 Annual Report</u> pg 90-95 pg 146-147 <u>FR Y-9C</u> pg 16-18 pg 28-31

(h)	Remaining contractual maturity breakdown (for example, one year or less) of the whole portfolio, broken down by major types of credit exposure.	FR Y-9C (Unaudited): • Schedule HC-B - Securities • Schedule HC-L - Derivatives and Off-Balance-Sheet Items Basel Pillar 3 Disclosures (Unaudited): Table 11--Credit Risk and Maturity by Exposure Type	15-16	FR Y-9C pg 16-18 pg 28-31
General Disclosure for Counterparty Credit Risk of OTC Derivative Contracts, Repo-Style Transactions, and Eligible Margin Loans				
Qualitative: (a)	The general qualitative disclosure requirement with respect to OTC derivatives, eligible margin loans, and repo-style transactions, including: (1) Discussion of methodology used to assign credit limits for counterparty credit exposures; (2) Discussion of policies for securing collateral, valuing and managing collateral, and establishing credit reserves; (3) Discussion of the primary types of collateral taken; (4) Discussion of the impact of the amount of collateral the bank holding company would have to provide given a deterioration in the bank's own creditworthiness.	2020 Annual Report (Audited): • MD&A Use of Derivatives to Manage Interest Rate and Other Risks (Unaudited) • Note 1--Significant Accounting Policies (Audited) • Note 19--Derivative Instruments (Audited) • Note 20--Netting Arrangements for Certain Financial Instruments (Audited) • Note 21--Fair Values of Assets and Liabilities (Audited) Form 10-O (Unaudited): • MD&A Use of Derivatives to Manage Interest Rate and Other Risks • Note 12--Derivative Instruments • Note 13--Netting Arrangements for Certain Financial Instruments • Note 14--Fair Values of Assets and Liabilities Basel Pillar 3 Disclosures (Unaudited): Counterparty Credit Risk of OTC Derivative Contracts, Repo-Style Transactions, and Eligible Margin Loans	8-9	2020 Annual Report pg 52 pg 79-86 pg 119-123 pg 124-126 pg 127-133 Form 10O pg 23 pg 55-60 pg 60-62 pg 62-68
Quantitative: (b)	Gross positive fair value of contracts, collateral held (including type, for example, cash, government securities), and net unsecured credit exposure.1 A [BANK] also must disclose the notional value of credit derivative hedges purchased for counterparty credit risk protection and the distribution of current credit exposure by exposure type.2	Basel Pillar 3 Disclosures (Unaudited): Table 5--General Disclosure for Counterparty Credit Risk of OTC Derivative Contracts, Repo-Style Transactions, and Eligible Margin Loans	9	
(c)	Notional amount of purchased and sold credit derivatives, segregated between use for the bank holding company's own credit portfolio and for its intermediation activities, including the distribution of the credit derivative products used, broken down further by protection bought and sold within each product group.	Form 100 (Unaudited): • Note 12--Derivative Instruments FR Y-9C (Unaudited): • Schedule HC-L - Derivatives and Off-Balance-Sheet Items		Form 10O pg 55-60 FR Y-9C pg 28-31
Credit Risk Mitigation				
Qualitative: (a)	The general qualitative disclosure requirement with respect to credit risk mitigation including: (1) policies and processes for, and an indication of the extent to which the bank holding company uses, on-and-off-balance sheet netting; (2) a description of the main types of collateral taken by the bank holding company; (3) the main types of guarantors/credit derivative counterparties and their creditworthiness; and (4) information about (market or credit) risk concentrations within the mitigation taken.	2020 Annual Report (Audited): • MD&A--Corporate Risk Profile • Note 1--Significant Accounting Policies • Note 4--Investment Securities • Note 5--Loans and Allowance for Credit Losses • Note 19--Derivative Instruments • Note 20--Netting Arrangements for Certain Financial Instruments • Note 21--Fair Values of Assets and Liabilities Form 100 (Unaudited): • MD&A--Corporate Risk Profile • Note 3--Investment Securities • Note 4--Loans and Allowance for Credit Losses • Note 12--Derivative Instruments • Note 13--Netting Arrangements for Certain Financial Instruments • Note 14--Fair Values of Assets and Liabilities Basel Pillar 3 Disclosures (Unaudited): Credit Risk Mitigation	7	2020 Annual Report pg 36-57 pg 79-86 pg 87-89 pg 90-95 pg 119-123 pg 124-126 pg 127-133 Form 10O pg 8-28 pg 40-42 pg 43-49 pg 55-60 pg 60-62 pg 62-68
Quantitative: (b)	For each separately disclosed credit risk portfolio, the total exposure that is covered by eligible financial collateral, and after the application of haircuts.	Basel Pillar 3 Disclosures (Unaudited): Credit Risk Mitigation	7	
(c)	For each separately disclosed portfolio, the total exposure that is covered by guarantees/credit derivatives and the risk-weighted asset amount associated with that exposure.	Basel Pillar 3 Disclosures (Unaudited): Credit Risk Mitigation	7	
Securitization				
Qualitative: (a)	The general qualitative disclosure requirement with respect to securitization (including synthetic securitizations), including a discussion of: (1) The bank holding company's objectives for securitizing assets, including the extent to which these activities transfer credit risk of the underlying exposures away from the bank holding company to other entities and including the type of risks assumed and retained with securitization activity; (2) The nature of the risks (e.g. liquidity risk) inherent in the securitized assets; (3) The roles played by the bank holding company in the securitization process and an indication of the extent of the bank holding company's involvement in each of them; (4) The processes in place to monitor changes in the credit and market risk of securitization exposures including how those processes differ for securitization exposures; (5) The bank holding company's policy for mitigating the credit risk retained through securitization and securitization exposures; and (6) The risk-based capital approaches that the bank holding company follows for its securitization exposures including the type of securitization exposure to which each approach applies.	2020 Annual Report (Audited): • MD&A Corporate Risk Profile (Off-Balance Sheet Arrangements) Form 100 (Unaudited) • MD&A Corporate Risk Profile (Off-Balance Sheet Arrangements) Basel Pillar 3 Disclosures (Unaudited): Securitization	9-10	2020 Annual Report pg 36-57 Form 10O pg 26

Table	Disclosure Requirement	Disclosure Location	Disclosure Page	Source Reference - if applicable
(b)	A list of: (1) The type of securitization SPEs that the bank holding company, as sponsor, uses to securitize third-party exposures. The bank holding company must indicate whether it has exposure to these SPEs, either on- or off- balance sheet; and (2) Affiliated entities: (i) That the bank holding company manages or advises; and (ii) That invest either in the securitization exposures that the bank holding company has securitized or in securitization SPEs that the bank holding company sponsors.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Securitization	9-10	
(c)	Summary of the bank holding company's accounting policies for securitization activities, including: (1) Whether the transactions are treated as sales or financings; (2) Recognition of gain-on-sale; (3) Methods and key assumptions and inputs applied in valuing retained or purchased interests; (4) Changes in methods and key assumptions and inputs from the previous period for valuing retained interests and impact of the changes; (5) Treatment of synthetic securitizations; (6) How exposures intended to be securitized are valued and whether they are recorded under subpart E of this part; and (7) Policies for recognizing liabilities on the balance sheet for arrangements that could require the bank holding company to provide financial support for securitized assets.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Securitization	9-10	
(d)	An explanation of significant changes to any of the quantitative information set forth below since the last reporting period.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Securitization	9-10	
Quantitative: (e)	The total outstanding exposures securitized by the bank holding company in securitizations that meet the operational criteria in §.141 (categorized into traditional/synthetic), by underlying exposure type separately for securitizations of third-party exposures for which the bank acts only as sponsor.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 6-- Securitization	10	
(f)	For exposures securitized by the bank holding company in securitizations that meet the operational criteria in §.141: (1) Amount of securitized assets that are impaired/past due categorized by exposure type; and (2) Losses recognized by the bank holding company during the current period categorized by exposure type.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 6-- Securitization	10	
(g)	The total amount of outstanding exposures intended to be securitized categorized by exposure type.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 6-- Securitization	10	
(h)	Aggregate amount of: (1) On-balance sheet securitization exposures retained or purchased categorized by exposure type; and (2) Off-balance sheet securitization exposures categorized by exposure type.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 6-- Securitization	10	
(i)	(1) Aggregate amount of securitization exposures retained or purchased and the associated capital requirements for these exposures, categorized between securitization and resecuritization exposures, further categorized into a meaningful number of risk weight bands and by risk-based capital approach (e.g. SSFA). (2) Exposures that have been deducted entirely from tier 1 capital, CEIOs deducted from total capital (as described in §1.42(a)(1), and other exposures deducted from total capital should be disclosed separately by exposure type.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 6-- Securitization	10	
(j)	Summary of current year's securitization activity, including the amount of exposures securitized (by exposure type), and recognized gain or loss on sale by asset type.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 6-- Securitization	10	
(k)	Aggregate amount of resecuritization exposures retained or purchased categorized according to: (1) Exposures to which credit risk mitigation is applied and those not applied; and (2) Exposures to guarantors categorized according to guarantor creditworthiness categories or guarantor name.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 9-- Securitization	10	
Equities Not Subject to Market Risk Rule				
Qualitative: (a)	The general qualitative disclosure requirement with respect to equity risk, including: (1) differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and (2) discussion of important policies covering the valuation of and accounting for equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices.	<u>2020 Annual Report (Audited):</u> Note 1--Significant Accounting Policies Note 7--Accounting For Transfers and Servicing of Financial Assets and Variable Interest Entities <u>Form 10-O (Unaudited):</u> Note 5--Accounting For Transfers and Servicing of Financial Assets and Variable Interest Entities <u>Basel Pillar 3 Disclosures (Unaudited):</u> Equity Securities Not Subject to Market Risk Rule	10-11	<u>2020 Annual Report</u> pg 79-86 pg 97-98 <u>Form 10O</u> pg 49-51
Quantitative: (b)	Value disclosed on the balance sheet of investments, as well as the fair value of those investments; for securities that are publicly traded, a comparison to publicly-quoted share values where the share price is materially different from fair value.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 7--Equity Securities Not Subject to Market Risk Rule	10-11	
(c)	The types and nature of investments, including the amount that is: (1) Publicly traded; and (2) Non-publicly traded.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 7--Equity Securities Not Subject to Market Risk Rule	10-11	
(d)	The cumulative realized gains (losses) arising from sales and liquidations in the reporting period.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 7--Equity Securities Not Subject to Market Risk Rule	10-11	
(e)	(1) Total unrealized gains (losses) (2) Total latent revaluation gains (losses) (3) Any amounts of the above included in tier 1 and/or tier 2 capital.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 7--Equity Securities Not Subject to Market Risk Rule	10-11	
(f)	Capital requirements broken down by appropriate equity groupings, consistent with the bank holding company's methodology, as well as the aggregate amounts and the type of equity investments subject to any supervisory transition regarding regulatory capital requirements.	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 7--Equity Securities Not Subject to Market Risk Rule	10-11	
Interest Rate Risk for Non-trading Activities				
Qualitative: (a)	The general qualitative disclosure requirement, including the nature of interest rate risk for non-trading activities and key assumptions, including assumptions regarding loan prepayments and behavior of non-maturity deposits, and frequency of measurement of interest rate risk for non-trading activities.	<u>2020 Annual Report (Audited):</u> • MD&A--Interest Rate Risk Management, Net Interest Income Simulation Analysis, and Market Value of Equity Modeling <u>10O (Unaudited):</u> • MD&A--Interest Rate Risk Management		<u>2020 Annual Report</u> pg 51 <u>Form 10O</u> pg 22

Table	Disclosure Requirement	Disclosure Location	Disclosure Page	Source Reference - if applicable
Quantitative: (b)	The increase (decline) in earnings or economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method for measuring interest rate risk for non-trading activities, broken down by currency (as appropriate).	<u>2020 Annual Report (Audited):</u> • MD&A--Interest Rate Risk Management, Net Interest Income Simulation Analysis, and Market Value of Equity Modeling <u>100 (Unaudited):</u> • MD&A--Interest Rate Risk Management		<u>2020 Annual Report</u> pg 51 <u>Form 100</u> pg 22
Supplementary Leverage Ratio				
Quantitative	(1) Summarize the differences between total consolidated accounting assets and the calculation of total leverage exposure. (2) Provide components of the total leverage exposure	<u>Basel Pillar 3 Disclosures (Unaudited):</u> Table 3-- Supplementary Leverage Ratio	6
